

Low-Income Energy Network (LIEN)

Mission Statement:

LIEN aims to ensure that all Ontarians have access to adequate, affordable energy as a basic necessity while minimizing the environmental impacts of energy generation and distribution.

LIEN promotes programs and policies that address energy poverty and homelessness, reduce Ontario's contribution to smog and climate change, and promote energy conservation and a healthy economy. These programs and policies must prioritize the more efficient use of energy, a transition to renewable sources of energy, and consumer education and protection.

Our vision is an Ontario where everyone has equitable access to conservation and financial assistance programs and services to meet their basic energy needs affordably and sustainably.

Background

LIEN was formed in 2004 by anti-poverty, affordable housing and environmental groups in response to the impact of rising energy prices on low-income Ontarians. LIEN has over 60 members from a broad range of environmental, legal, tenant/housing, and social service organizations across Ontario that have endorsed our mandate. LIEN is directed by a Steering Committee made up of representatives across the province.

We seek to raise awareness of, and propose solutions to, energy poverty through:

- Outreach to community groups to involve them in LIEN;
- Outreach to the public, e.g. through the media;
- Participating in OEB hearings and legislative processes;
- Working with policy-makers and local utilities.

Advocacy

LIEN's advocacy activities have resulted in:

- The development of the **Low-Income Energy Assistance Program (LEAP)**, which includes emergency financial assistance and low-income customer service rules, designed to help low-income Ontarians better manage their electricity and natural gas bills.
- The establishment of the **Ontario Electricity Support Program (OESP)**, which provides a monthly credit to low-income customers based on household income and household size.

LIEN continues to participate on the OEB's Financial Assistance Working Group (FAWG) to address ongoing delivery and implementation issues associated with the roll-out of the LEAP initiatives and the OESP.

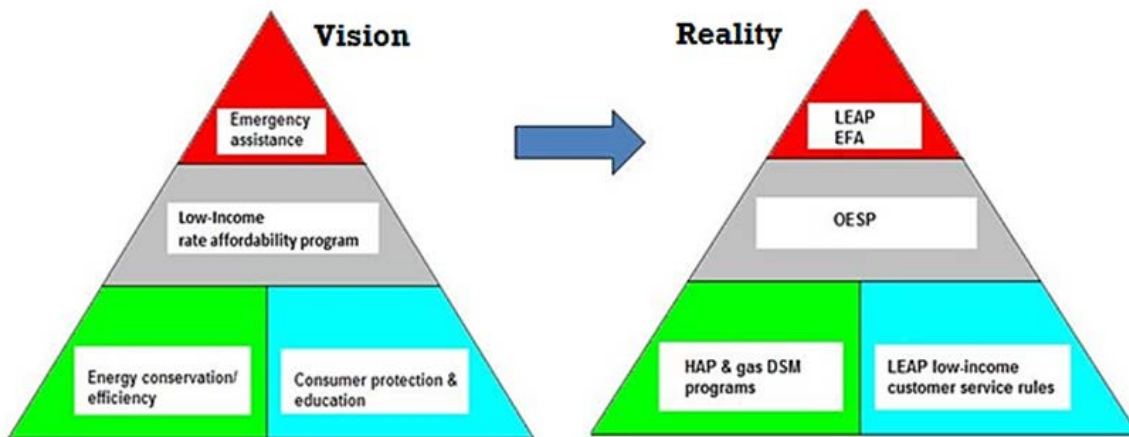

- The development of the **saveONenergy HOME ASSISTANCE Program (HAP)**, which provides eligible low-income homeowners and tenants with free energy upgrades in their home, thereby helping them reduce their energy bills. HAP is funded through the Independent Electricity System Operator (IESO) and offered by local electric utilities which contract with third party delivery agents.
- The development of the Enbridge Gas **Home Winterproofing Program** and Union Gas **Home Weatherization Program**, which provide eligible low-income participants with a free home energy

assessment and weatherization upgrades, at no cost, to lower energy bills, improve energy efficiency and make the home more comfortable.

- The announcement of the Ontario **Fair Hydro Plan**, which includes the increase of OESP credits by 50% and the enhancement of the Rural or Remote Electricity Rate Protection (RRRP) program. It also includes an **Affordability Fund** that will assist electricity customers who cannot qualify for low-income conservation programs, such as HAP, but are unable to undertake energy efficiency improvements without financial assistance.
- LIEN has hosted ten annual conferences, the most recent on March 23, 2016 in Toronto with financial support from Legal Aid Ontario. The conference, entitled ***“Meeting the challenges of energy affordability”***, involved over 50 participants representing a range of organizations from the anti-poverty, affordable housing and environmental communities, as well as representatives from local utilities, the Ministry of Energy, and the Ontario Energy Board (OEB).

LIEN’s Low-Income Energy Conservation and Assistance Strategy

LIEN’s strategy to address energy poverty involves a province-wide, comprehensive approach to low-income energy conservation and assistance. It places the greatest emphasis and resources on long-term, environmentally sustainable measures to reduce energy consumption and costs for low-income households. As a result of LIEN’s advocacy work over the years, Ontario now has a comprehensive energy poverty strategy in place.
